

Instructions for Programming Problem(s)

To complete the homework problems that involve programming, follow the below instructions:

1. Open the folder for the homework that was extracted from the ZIP file in Visual Studio Code.
2. In Visual Studio Code, build the Development Container contained in the folder.
3. Complete the tasks marked with TODO in the ".py" and homework PDF files.

For instructions on setting up Dev Containers and Visual Studio Code, please see the [\[0.2.1\] Setting Up a Development Environment for Homework Assignments](#) page on Bruin Learn.

If you encounter any problems with the above steps please reach out to your T.A. via email or during office hours.
